1 GraphDB

Thore Krüss, Lennart Purucker, Johanna Sommer

1.1 Introduction

1.1.1 Motivation

why its imporant, history, context

1.2 Graph Database Theory

1.2.1 Description of data model and functionality

1.2.2 fields of application

1.2.3 CAP Theorem

1.2.4 GraphDB vs. RDBMS

1.3 Implementation with Neo4j

1.3.1 Use Case from the SQL world

1.3.2 Installation

1.3.3 modelling

1.3.4 usage, query language

1.3.5 short conclusion, summary

1.4 reflection

1.4.1 alternative popular graphdbs

1.4.2 conclusion

reflect on advantages disadvantages with implementation references
